PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 12+ years of experience building and supporting business-critical software across logistics, B2B SaaS, eCommerce, healthcare, and retail. Strong experience with PHP/Laravel, Vue.js, JavaScript, TypeScript, SQL, REST APIs, and AWS, with hands-on work across system architecture, development, third-party integrations, production debugging, and client support.

Over 5 years of remote engineering experience developing production logistics and eCommerce platforms, including shipping automation, carrier integrations, fulfillment workflows, and marketplace integrations. Independently developed Jevly POS from the ground up, with hands-on experience designing multi-tenant architecture, offline-first systems, complex business workflows, and production infrastructure. Uses AI-assisted development tools such as ChatGPT, Gemini, and Cursor as part of modern development and troubleshooting workflows.

CORE EXPERTISE

Full-Stack Development · PHP/Laravel · Vue.js · TypeScript · JavaScript · SaaS Platforms · System Architecture · API & Third-Party Integrations · Multi-Tenant Systems · Offline-First Applications · Database Design · Production Debugging · Client & Stakeholder Support · Software Modernization · AI-Assisted Development

PROFESSIONAL EXPERIENCE

STALLION EXPRESS

Full-Stack Engineer | Oct 2020 – Apr 2026

Remote full-stack engineering role for a Canadian logistics and shipping company, developing and supporting production systems for shipping automation, fulfillment, tracking, and eCommerce integrations.

- Developed and maintained shipping workflows covering shipment creation, rate calculation, fulfillment, tracking, and order processing.
- Built and maintained integrations with 7+ carriers, including Canada Post, UPS, FedEx, Purolator, Canpar, DHL, and ICS Courier.
- Developed integrations with major eCommerce platforms including Shopify, Amazon, WooCommerce, eBay, Etsy, and Walmart Marketplace.
- Worked extensively with APIs, webhooks, background processes, synchronization workflows, and third-party services.
- Investigated and resolved production issues involving application logic, databases, APIs, external services, and data synchronization.
- Worked directly with stakeholders and operations teams to understand requirements, troubleshoot issues, and deliver practical solutions.
- Supported customer-facing workflows through bug fixing, issue investigation, and production support.

QGP LIMITED

Senior Full-Stack PHP Developer | Mar 2021 – Oct 2025

Concurrent full-time engineering role

Senior full-stack role focused on Laravel-based SaaS and marketplace platforms, internal business systems, third-party integrations, reporting, and automation.

- Developed and maintained Laravel applications supporting marketplace ordering, campaigns, reporting, content operations, and internal business workflows.
- Built integrations with services including Ahrefs, Majestic, Google Search Console, WordPress, indexing services, and other external APIs.
- Designed database structures, reporting workflows, automated processes, and systems handling large datasets.
- Modernized legacy application components while maintaining existing production functionality.
- Investigated and resolved production issues across application logic, databases, APIs, queues, and business workflows.
- Worked with business requirements and translated operational needs into application features and workflow improvements.

TRITONTEK, INC.

Senior Software Engineer | Aug 2019 – Oct 2020

Full-stack software engineering role focused on PHP/Laravel applications, backend business systems, web interfaces, and application modernization.

- Developed and modernized PHP/Laravel applications and backend business modules.

- Worked across backend development, AngularJS interfaces, WordPress, databases, and integrations.
- Participated in requirements gathering, implementation, troubleshooting, and production support.
- Collaborated with stakeholders to understand business requirements and deliver application improvements.

FIERCECOM INCORPORATED

Web Developer / Full-Stack Developer | Sep 2018 – Aug 2019

Full-stack development role focused on Laravel-based eCommerce applications, payment integrations, APIs, databases, and production support.

- Developed Laravel-based eCommerce applications and business systems.
- Built integrations with payment gateways and third-party APIs.
- Worked across backend development, relational databases, frontend functionality, deployment, and production support.
- Investigated bugs and implemented fixes across application and integration layers.

ST. VINCENT GENERAL HOSPITAL

IT Specialist / Database Administrator | Jul 2014 – Sep 2018

IT and database administration role supporting hospital information systems, internal applications, production databases, and legacy data migration.

- Supported hospital information systems and internal applications in a production environment.
- Worked with laboratory information systems and relational databases.
- Performed database administration, troubleshooting, maintenance, and data migration.
- Migrated legacy patient records and supported internal users and business-critical systems.

SELECTED PROJECTS & PRODUCTS

JEVLY POS

Independent Product Development | Nov 2025 – Present

Production multi-tenant B2B POS and business management platform developed from the ground up for Philippine SMEs.

- Designed and developed the platform across Laravel, Vue.js, TypeScript, relational databases, and AWS.

- Built an offline-first architecture using browser-side storage and synchronization for unreliable internet environments.
- Developed core workflows covering POS sales, inventory, purchasing, payments, customers, reporting, audit trails, and multi-branch operations.
- Implemented multi-tenant architecture supporting separate businesses, branches, and operational data.
- Developed Philippine fiscal workflows including receipt generation, X/Z Readings, transaction journals, audit logging, and related compliance workflows.
- Built specialized workflows for food & beverage, pharmacy, inventory costing, recipes, and business operations.
- Managed the full product lifecycle from requirements and architecture through development, deployment, troubleshooting, and ongoing improvements.

TECHNICAL SKILLS

Languages: PHP · JavaScript · TypeScript · SQL

Frameworks & Libraries: Laravel · Vue.js · Vue 3 · Pinia · PrimeVue · Vuetify · AngularJS · WordPress

Backend: REST APIs · API Integrations · Authentication · Queues · Background Jobs · Webhooks

Databases & Storage: MySQL · PostgreSQL · Microsoft SQL Server · SQLite · Redis · IndexedDB

Cloud & Infrastructure: AWS · EC2 · RDS · S3 · CloudFront · Route53 · IAM · VPC · CloudWatch · SES · AWS Backup · Laravel Forge

Development & Tools: Git · Docker · Linux · CI/CD · AI-Assisted Development · ChatGPT · Gemini · Cursor

Engineering: System Architecture · Multi-Tenant Systems · Offline-First Applications · Database Design · Production Debugging · Testing · Software Modernization

EDUCATION

University of Cebu

Bachelor of Science in Information Technology | 2009 – 2014
