PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 12+ years of experience building and supporting business-critical software across logistics, B2B SaaS, eCommerce, healthcare, and retail. Strong hands-on experience with PHP/Laravel, Vue.js, JavaScript, TypeScript, SQL, REST APIs, and AWS.

Over 5 years of remote engineering experience with a Canadian logistics and shipping company, with additional experience building SaaS, marketplace, multi-tenant, and offline-first systems. Experienced across the full software lifecycle, including architecture, development, integrations, database design, deployment, production troubleshooting, and ongoing support.

CORE EXPERTISE

Full-Stack Development · PHP/Laravel · Vue.js · TypeScript · JavaScript · SaaS Platforms · System Architecture · API & Third-Party Integrations · Multi-Tenant Systems · Offline-First Applications · Database Design · Production Debugging · Client & Stakeholder Support · Software Modernization · Business Process Automation · AI-Assisted Development

PROFESSIONAL EXPERIENCE

STALLION EXPRESS

Full-Stack Engineer | Oct 2020 – Apr 2026

Remote full-stack engineering role for a Canadian logistics and shipping company, developing and supporting production systems for shipping automation, fulfillment, tracking, and eCommerce integrations.

- Developed and maintained shipping workflows covering shipment creation, rate calculation, fulfillment, tracking, and order processing.
- Built and maintained integrations with 7+ carriers, including Canada Post, UPS, FedEx, Purolator, Canpar, DHL, and ICS Courier.
- Developed integrations with major eCommerce platforms including Shopify, Amazon, WooCommerce, eBay, Etsy, and Walmart Marketplace.
- Worked extensively with REST APIs, webhooks, background processes, synchronization workflows, and third-party services.
- Investigated and resolved production issues involving application logic, databases, APIs, external services, and data synchronization.
- Worked directly with stakeholders and operations teams to understand requirements, troubleshoot issues, and deliver practical solutions.
- Supported customer-facing workflows through bug fixing, issue investigation, and production support.

TRITONTEK, INC.

Senior Software Engineer | Aug 2019 – Oct 2020

Full-stack software engineering role focused on PHP/Laravel applications, backend business systems, web interfaces, and application modernization.

- Developed and modernized PHP/Laravel applications and backend business modules.
- Worked across backend development, AngularJS interfaces, WordPress, databases, and third-party integrations.
- Participated in requirements gathering, implementation, troubleshooting, and production support.
- Collaborated with stakeholders to understand business requirements and deliver application improvements.

FIERCECOM INCORPORATED

Web Developer / Full-Stack Developer | Sep 2018 – Aug 2019

Full-stack development role focused on Laravel-based eCommerce applications, payment integrations, APIs, databases, and production support.

- Developed Laravel-based eCommerce applications and business systems.
- Built integrations with payment gateways and third-party APIs.
- Worked across backend development, relational databases, frontend functionality, deployment, and production support.

- Investigated bugs and implemented fixes across application and integration layers.

ST. VINCENT GENERAL HOSPITAL

IT Specialist / Database Administrator | Jul 2014 – Sep 2018

IT and database administration role supporting hospital information systems, internal applications, production databases, and legacy data migration.

- Supported hospital information systems and internal applications in a production environment.
 - Worked with laboratory information systems and relational databases.
 - Performed database administration, troubleshooting, maintenance, and data migration.
 - Migrated legacy patient records and supported internal users and business-critical systems.
-

SELECTED EXPERIENCE

JEVLY POS

Product Owner / Full-Stack Engineer

Production multi-tenant B2B POS and business management platform built from the ground up for Philippine SMEs. Responsible for product direction, system architecture, and full-stack development across Laravel, Vue.js, TypeScript, relational databases, and AWS, including offline-first architecture (PWA), multi-branch operations, inventory, purchasing, reporting, and Philippine fiscal workflows.

SAAS & MARKETPLACE PLATFORMS

Full-Stack PHP / Laravel Developer

Developed Laravel-based SaaS and marketplace platforms, including a link-building and guest-post management platform integrated with **Ahrefs, Majestic, Google Search Console, WordPress, and third-party APIs**. Built business workflows for order management, site discovery, reporting, data processing, background jobs, queues, and large-scale datasets, while modernizing legacy PHP applications and business processes.

TECHNICAL SKILLS

Languages: PHP · JavaScript · TypeScript · SQL · C# / .NET
